

'k Heb eigenlijk nooit echt met agencies gewerkt. Ik deed altijd alles zelf, m'n teksten, m'n beelden, m'n websites. Niet omdat 't moest, maar omdat ik 't graag in eigen handen hou. Het enige probleem? 't Duurde eindeloos. Eén pagina kon weken aanslepen.

En toen ontdekte ik die skills. Geen ingewikkeld gedoe, gewoon kleine setjes instructies waardoor m'n AI ineens snapte waar ik mee bezig was. Diezelfde dingen waar ik vroeger weken op zat te zwoegen, maak ik nu op nen namiddag. 't Gaat letterlijk 1000 keer vlotter.

'k Heb m'n twintig favorieten ne keer voor je op een rijtje gezet. Mét de links, zodat je zelf niet moet gaan zoeken.

— ↓ HOE JE EEN SKILL INSTALLEERT

- 01 Je opent Claude Code, in je terminal of in de app.
- 02 Je voegt de skill toe via de marketplace, of je plaatst het bestand in je skills-map.
- 03 Claude pikt het automatisch op. Vanaf dan kan hij wat de skill hem leert.

TWINTIG SKILLS, ÉÉN PER DING DAT JE WIL MAKEN

01

Marketing Skills

by Corey Haines

Installs 30+ free marketing agents that handle SEO audits, copywriting, email sequences, CRO, analytics, and growth engineering. Each skill reads your product context first so every output is tailored to your brand, audience, and positioning. Like hiring an entire marketing team that works inside Claude.

➤ github.com/coreyhaines31/marketingskills

02

Stop-Slop

by Hardik Pandya

Forces Claude to strip out every AI giveaway from your writing. Catches throat-clearing openers, emphasis crutches, filter phrases, structural cliches, binary contrasts, dramatic fragmentation, and the AI vocabulary words that scream "a robot wrote this." Your writing will actually sound like a real human.

➤ github.com/hardikpandya/stop-slop

03

UI/UX Pro Max

by Next Level Builder

Gives Claude a built-in database of 50+ UI styles, 161 color palettes, 57 font pairings, 99 UX guidelines, and 25 chart types across 10 frameworks (React, Next.js, Vue, Svelte, SwiftUI, React Native, Flutter, Tailwind, shadcn/ui, HTML/CSS). Say "fintech dashboard" and it picks the style, colors, and typography automatically.

➤ github.com/nextlevelbuilder/ui-ux-pro-max-skill

04

Remotion Video

by Remotion Dev

Lets Claude open its own video editor and build fully animated, production-ready videos from a single text prompt. Uses React under the hood, with 29 domain-specific rules covering 3D, animations, audio, captions, charts, and transitions. The official skill from the Remotion team.

➤ github.com/remotion-dev/skills

05

Context Engineering Kit

by NeoLab HQ

Reduces the amount of tokens Claude uses per response so you stop hitting usage limits. Teaches Claude efficient response patterns with minimal token footprint while maintaining full quality. Compatible with Claude Code, OpenCode, Cursor, Gemini CLI, and more.

➤ github.com/NeolabHQ/context-engineering-kit

06

Arcads

by Kruse Media LLC

Create AI marketing videos and images using your Arcads account, powered by AI agents in Claude Code. Supports Sora 2, Veo 3.1, Kling 3.0, and Nano Banana for video generation, and includes skills for UGC video ads, YouTube thumbnails, and AI influencer content.

➤ github.com/krusemediallc/arcads-claude-code

07

Superpowers

by Jesse Vincent

The biggest community-built skill library in the Claude ecosystem with 40,000+ GitHub stars. A composable framework that structures the full software development lifecycle: brainstorming, git worktree setup, implementation planning, subagent execution, TDD, and code review before merging.

➤ github.com/obra/superpowers

08

Picsart GenAI CLI

by Picsart

Gives Claude access to 140+ AI models for generating images (Flux, Recraft, Nano Banana), videos (Sora, Kling, Veo, Runway), and audio (ElevenLabs). Pay-per-use credits, no subscription. Turn Claude into a full creative studio for images, video, audio, and editing.

➤ picsart.com/gen-ai-cli

09

AI Sales Team

by Zubair Trabzada

An AI-powered sales team for Claude Code with 14 skills and 5 parallel agents. Researches prospects, qualifies leads using BANT and MEDDIC frameworks, finds decision makers, generates personalized outreach, prepares meetings, writes proposals, and produces PDF pipeline reports.

➤ github.com/zubair-trabzada/ai-sales-team-claude

10

Obsidian Second Brain

by Eugeniu Ghelbur

Turns your Obsidian vault into a living, AI-powered second brain with 31 commands across 4 layers. Claude operates your vault without you opening Obsidian, pulls live web research into your notes, runs scheduled agents that update your vault while you sleep, and synthesizes knowledge across years of notes.

`Zoek op "Obsidian Second Brain skill"`

11

Trail of Bits Security

by Trail of Bits

Professional security expertise from one of the most respected security firms in the world. Static analysis, variant analysis, and vulnerability detection on your codebase. Built by real security researchers, not generic AI rules. Covers web, API, smart contract, and infrastructure security.

➤ github.com/trailofbits/skills

12

Caveman Mode

by Julius Brussee

Makes Claude talk in ultra-compressed language, cutting approximately 75% of output tokens while keeping full technical accuracy. If you are constantly hitting Claude's usage limits, this dramatically extends how much you can accomplish per session.

➤ github.com/juliusbrussee/caveman

13

Playwright Skill

by Justin Lackey

Gives Claude the ability to write and execute browser automation on the fly using Playwright. Claude autonomously decides when to use it, opens a real browser, navigates your app, clicks buttons, fills forms, takes screenshots, and verifies everything works. Your entire QA process, automated.

➤ github.com/lackeyjb/playwright-skill

14

SEO Machine

by Craig Hewitt

A specialized workspace for creating long-form, SEO-optimized blog content. Handles research, writing, analysis, and optimization. Describe your topic and target keywords and Claude produces a full article structured to rank on Google, with keyword clustering and content gap analysis.

➤ github.com/TheCraigHewitt/seomachine

15

Entrepreneur Skills

Vierentwintig workflows op maat van founders. Van pricing tot pitch tot planning. Het soort dingen waar je normaal een mentor voor belt.

➤ github.com/mfwarren/entrepreneur-claude-skills

16

D3.js Visualization

by Chris von Csefalvay

Teaches Claude to produce interactive data visualizations using D3.js. Builds SVG-based graphics you can embed in websites, presentations, or reports. A data visualization expert in a single skill, with custom color schemes and responsive layouts.

➤ github.com/chrisvoncsefalvay/claude-d3js-skill

17

iOS Simulator Skill

by Conor Luddy

Optimizes Claude's ability to build, run, and interact with iOS apps through the simulator. Wraps xcodebuild commands to save context and lets Claude navigate your app, take screenshots, and test interactions. Closes the loop between writing code and seeing it run.

➤ github.com/conorluddy/ios-simulator-skill

18

Frontend Slides

by Rui Zhang

Creates animation-rich HTML presentations from scratch or converts existing PowerPoint files into beautiful web-based slide decks with smooth transitions and responsive layouts. Looks significantly better than anything you could build in PowerPoint or Google Slides.

➤ github.com/zarazhangrui/frontend-slides

19

Algorithmic Art

by Anthropic

An official skill from the Claude team that creates generative art using p5.js with seeded randomness and particle systems. Describe the visual style you want and Claude builds code-generated art that is unique every time. Infinite variations by changing the random seed.

➤ github.com/anthropics/skills

20

React Native Agent Skills

by Callstack

The official React Native skill collection from Callstack, the core contributors to React Native. Deep expertise in JavaScript/React patterns, native iOS and Android integration, bundling, app size optimization, and platform-specific best practices.

➤ github.com/callstackincubator/agent-skills
